Action

Ref.: Goods Movement Advisory Committee Mission Statement

At its December 9, 2004 meeting, the Commission asked staff to return with a mission statement for the Goods Movement Advisory Committee at the January 2005 Commission Meeting. Below is the mission statement that was developed for discussion and action.

Goods Movement Advisory Committee Mission Statement

Mission: The Goods Movement Advisory Committee is charged with recommending to the Commission policy action that the Legislature and the Administration could consider in order to address the growing demands for goods movement and California's ability to remain competitive economically.

In particular the Advisory Committee is charged with reviewing, considering and advising the Commission on the following matters:

- Infrastructure needs as they relate to goods movement.
- Where state and federal investments in infrastructure would have the most effective impact on California's economy.
- Topics and issues for roundtables to bring together private goods movement stakeholders and public goods movement planners to share information on local goods movement issues.
- Review of goods movement related legislative bills and recommended positions.
